Supernova

Oomph!

You're like a seraphim, you're good to the bone
The slightest mending could not finely hone
You would not make it if you were on your own
And this is why I'll never leave you aloneYou can't start from
(Where I end)
You can't start from
(Where I end)You walked into my trap and I let it spring
(Follow me home)
Because someone should take you under his wing
(Follow me home)You felt the cleansing of my pain-killing sting
(Follow me home)
Now if you need some more just give me a ringYou can't start from
(Where I end)
You can't start from
(Where I end)Unite and take over
Create a supernova
Unite and take over
Create a supernovaGive it to me, give it to me, give in to me
Give it to me, give it to me, give in to me
Give it to me, give it to me, give in to me
Give it to me, give it to me, give in to meGive it to me, give it to me, give in to me
Give it to me, give it to me, give in to me
Give it to me, give it to me, give in to me
Give it to me, give it to meYou can start from
(Where I am)
You can start from
(Where I am)Unite and take over
Create a supernova
Unite and take over
Create a supernovaUnite and take over
Now I've got you deep inside me
Unite and take over
Now I've got you deep inside my soul
