Something Funny

Buck-O-Nine

I have waited for you
Every morning, self-supporting
I deploy and listen for it nowIt gets written on your face
And then you go to face it
Let's embrace it or erase it nowLiar, liar, liarI think that something funny's
Happened to me
I said, I think that something funny's
Happened to me
I said, I think that someone should
Erase this or just face itThis a situation
Understated, complicated
Don't avoid the issue
What's the cause?It's so written on your face
When you go to face it
Let's embrace it or erase it nowLiar, liar, liarI think that something funny's
Happened to me
I said, I think that something funny's
Happened to me
I said, I think that someone should
Erase this or just face itLiar, liar, liarI was always holding on
Involving us, recalling
Waiting for that moment to arriveLiar, liar, liarI think that something funny's
Happened to me
I said, I think that something funny's
Happened to me
I said, I think that someone should
Erase this or just face itI think that someone should erase this
Well, I think that someone should erase this
I think that someone should erase this
I think that someone should erase this
I think that someone should erase this
