

# Something Funny

## Buck-O-Nine

I have waited for you  
Every morning, self-supporting  
I deploy and listen for it now It gets written on your face  
And then you go to face it  
Let's embrace it or erase it now Liar, liar, liar I think that something funny's  
Happened to me  
I said, I think that something funny's  
Happened to me  
I said, I think that someone should  
Erase this or just face it This a situation  
Understated, complicated  
Don't avoid the issue  
What's the cause? It's so written on your face  
When you go to face it  
Let's embrace it or erase it now Liar, liar, liar I think that something funny's  
Happened to me  
I said, I think that something funny's  
Happened to me  
I said, I think that someone should  
Erase this or just face it Liar, liar, liar I was always holding on  
Involving us, recalling  
Waiting for that moment to arrive Liar, liar, liar I think that something funny's  
Happened to me  
I said, I think that something funny's  
Happened to me  
I said, I think that someone should  
Erase this or just face it I think that someone should erase this  
Well, I think that someone should erase this  
I think that someone should erase this  
I think that someone should erase this  
I think that someone should erase this
