Brightest Star

the subdudes

I saw a star above the clouds
It was the brightest one
And I have just begun to understand you
You give me reason to believe
And though I've doubted you
You always see me through
I would owe to you
Your love
You give it away
I fall to my knees and I pray
And from a cross they say you give your love to everyone
I think of all I've done
And still you care for me
Your love
You give it away
I fall to my knees and I pray
Your loveAnd in the crowd I smile and listen
As the children sing
Their voices caroling
Each lyric means one thing
Your love
You give it away
I fall to my knees and I pray
Your love
Your love
I praise your love
