

# Under the Sight of Horus

## Varathron

Look in the sky the wingrd angels  
Beyond the invisible horizon  
The kingdom of isolted angels

Where stoneshaped shadows mourn (what they're lost!)The mystic vision of Osiris  
The mighty god of Sevia

Till, the promising truth of horus

(As) predicted by priest mefanthaYou laugh for darkness domination  
You laugh for living plagues

The owner of curse once covered the city

Transform the demon inside you.Under the sight of horusThe chosen one

The lord of sacred pain

The king of desolation

Hail erebus, lord of death.Beyond the southern seas

Where mortal search your path

A gate to underworld

The vision of thousand priestsUnder the sight of horusThe stone valley of death

There, you will find the truth

From the sacred book of invocation

(And then) you will open the gates for them.
