

Unchain the Rain

Altaria

We tread these paths of light so long
I'm right beside you just like thousand times before
I'm knocked at agony, I face a tragedy
That feeling, deceiving, that burning your soul
My kingdom come, my will be done
So join me fallen one
We'll drown our sorrow to this endless sea
Together we'll unchain the rain
Escape the world into our sanctuary
There in my arms you'll be free
Your guilt I will justify
I'll make you mine to have, to hold and embrace
A spark of mystery, the dark discovery
In your laws, my greatest victory
Closer a part, to offer hearts
Let us share the stars
Drown your sorrow to my endless sea
Together we'll unchain the rain
Escape the light into my sanctuary
There in my arms you'll be free
So may times we have been fallen
So many times I've heard you swearing that we're through
As many times you have come crawling
Cause noone else can ease your pain the way I do
We'll drown our sorrow to this endless sea
Together we'll unchain the rain
Escape the light into our sanctuary
There in my arms you'll be free
We'll drown our sorrow to this endless sea
Together we'll unchain the rain
And share our secret night-time fantasy
Together in forever sleep
