

# Robot Love

## Lords of Acid

I want to please my maker, my master, my creator  
Wherever you go, I come along  
I obey your orders, they sound so strong  
I have no blood, no heart, no veins  
My electronic circuit is my brain  
I don't eat, I don't sleep  
A loss of power makes me weak  
You gave me life, I give you joy, (robot love (x4))  
You gave me life, I give you joy, (robot love (x4))  
You have made me what I am  
A lady robot for a madman  
Arms of iron, legs of steel  
There's no human warmth to feel  
Sex makes all my fuses blow  
Kiss me and my oil will flow  
My lips are cold, my eyes are red  
You made my earrings out of lead  
You gave me life, I give you joy, (robot love (x4))  
You gave me life, I give you joy, (robot love (x4))  
You turned me into a love machine  
You call me names you are so mean  
I'm full of chips, you're my user  
You make me come on your computer  
My pussy works like a vibrator  
That's how you want it, that's how you made her  
When your digital orgasm is done  
You switch me off and then you're gone  
You gave me life, I give you joy, (robot love (x4))  
You gave me life, I give you joy, (robot love (x4)) (x2)
