

Danger

The Motet

She keeps her secrets
Tucked in her bird nest hair
Like a maze craze, tryin to find your way might take days
Boy so you better bewareShe ain't evil,
But she's far from kind
She a see saw knee drop praise to the heavens
Hurricane that'll leave you blindShe's got the key, she'll use to(o)
Light the fire inside of you
Step to the side
Or take the ride
There's no where else to run or hideDANGER! Can't fight the feeling no more
You've got to believe
(This) STRANGER! Too hypnotic to ignore
She's got what you need10 steps ahead
She knows just what to do
Her LOVE don't come for free she gotta see if you're stepping trueThe only war is in your mind
Her hocus-pocus comes into focus as you leave all your cares behindShe's got the key, she'll use to(o)
Light the fire inside of you
Step to the side
Or take the ride
There's no where else to run or hideShe's got the key, she'll use to(o)
Light the fire inside of you
Step to the side
Or take the ride
There's no where else to run or hide
