

Connected

Javelins

No one else will help us to get through
So by ourselves, we'll know just what to do
We are connected, we'll never be alone
We walk together forever down that road
You and I will share all that we know
So close your eyes and just let yourself go
We are connected, we'll never be alone
We walk together forever down that road
We are connected, we'll never be alone
We walk together forever down that road, road
And if you fall behind and don't know what to do
I promise I'll be waiting there for you, for you
Follow me into a better day
We'll be alright, no matter what they say
We are connected, we'll never be alone
We walk together forever down that road
We are connected, we'll never be alone
We walk together forever down that road
Road, road, road
