

LONELY NIGHTS

D-Side

No more lonely nights For everybody that find's their way

Someone is lost

For everybody who feels the fear

I'll take half the pain that you hide

Inside Chorus:

If it's meant for you, it won't pass you by,

Don't live your life on the line

Like a carousel, it'll turn around, so many times

We might change a bit, doesn't everyone,

Lost in the moment we find

And madness is right, when you're by my side,

No more lonely nights So many words that I meant to say

Don't come out right

So many chances I have to take

Girl if I've never told you before

Your beautiful Chorus Everytime that we kiss you take me breath away

I could talk for the world but you can silence me

I get lost in your arms when you're holding me

No more lonely nights If it's meant for you, it won't pass you by Chorus(2) For everybody that find's their way

Someone is lost
