

Siren (feat. Pia Toscano)

Vicetone

Like a wake-up call
From the darkest fall
Yeah, we waste it all Suddenly I see
All that love can be
I can barely breathe You are my revolution (Revolution)
My only one
My lives love sick solutions (Sick solutions) And if you ever doubt it
How I feel about ya
I was screaming out into the night
Shouted from the rooftops
And I swear I won't stop
Till you hear this lovely loud the sky Like a siren
Like a siren (Instrumental) Over all the noise
You're the only voice
Running through my head (Running through my head)
Music to my soul
Deeper than it goes
I was all controlled You are my revolution (Revolution)
My only one
My lives love sick solutions (Sick solutions) Before you take it long
All I felt was love
And when my heartbeat drums
I hope you know it's for your love And if you ever doubt it
How I feel about ya
I was screaming out into the night
Shouted from the rooftops
And I swear I won't stop
Till you hear this lovely loud the sky Like a siren
Like a siren (Instrumental)
Like a siren
Like a siren
