Happy You, Lonely Me

Norma Jean

Happy you sad and lonely me
[el.banjo]
When I'm with friends they just don't know the way I feel
If they could see inside of my heart they'd know the smile's not real
At parties I tell jokes and laugh good timin' up the crowd
But in my room alone I cry and call your name out loud
Happy you sad and lonely me you've got her love but I've got only misery
Goodbye love hello Mr Blues since he walked out I've been expecting you
[steel]
I tried concealing all the things I felt inside
And darling I was doing fine till you walked by
Seeing you with her was just too much for me
I let the teras roll down my face for all the world to see
Happy you sad and lonely me...
