# Pungent Excruciation

## Carcass

Sanguinary disinterment
Necrobiotic rash
Gnawing, throbbing anguish
The gullet is now mashedPungent excruciation
Flesh mummified by lice
Amputated contusion
Help yourself to a sliceContamination
Strangulation
MutilationGangrenous abscesses
Paralysis sets in
More carnage and bloodshed
And the reek of molten skinFrenzied detruncation
Dispeptic, charred and black
Terminal putrescence
Psychotics carve and hackOsteoporous enzymes release deadly secretions
As the clotted parasites devour the excretion
Emanation, suppuration, blood starts to gush
My nocturnal dysentry is unleashed on this mush
