Home Planet

S.P.O.C.K

Out on mission
on a planet far away
Been her for a long time
but I don't want to stay
Searching for new life-forms
never ever seen
Yesterday I saw one
it was something big and greenWe were sent out many years ago
then I wasn't afraid to go
but I didn't know
We slept the hypersleep for many years
going through the space without any fear
of what could happen here
Take me back to my home planet
Help me back to my home planet
I want to go home
As we came closer to this big asteroid
we all woke up
and I already felt a little paranoid
After we had landed we looked around
didn't see a thing
but heard a lot of strange sounds
Was that a move in the ground?
Take me back to my home planet
Help me back to my home planet
I want to go home
Suddenly they were around us everywhere
I started to run, I didn't know where
as long as I got out of there
Now I stand here all alone
my radio is broke
and all I see is stone
How will I get home?
Take me back to my home planet
Help me back to my home planet
I want to go home
