

321

Hedley

I heard a distant early warning
But I chose to ignore it
It came back and bit me Seems like we're victims of bad timing
'Cause you wanted more than I did
I can't give you what you need She said, Hold me, hold me
Closely, closely"
That's when I should have ran 321, it's the final meltdown, I want out now
I wish I would've known to doubt you
I'm better off alone without you 321, it's the same old story, love gets gory
Why'd we have to go and change things?
Now touching you is such a strange thing I got so caught up in the moment
That I forgot what it all meant
But still I'd do it all again You said, "No strings attached, I'm wild"
I didn't know you're in denial
And you became my ball and chain She said, Hold me, hold me
Closely, closely"
That's when I should have ran 321, it's the final meltdown, I want out now
I wish I would've known to doubt you
I'm better off alone without you 321, it's the same old story, love gets gory
Why'd we have to go and change things?
Now touching you is such a strange thing She said, "Hold me, hold me, closely, closely
Hold me, hold me, closely, closely
That's when I should have run, run, run, run 321, it's the final meltdown, I want out now
I wish I would've known to doubt you
I'm better off alone without you 321, it's the same old story, love gets gory
Why'd we have to go and change things?
Now touching you is such a strange thing She's holding on while she can
Why'd we have to go and change things?
She's holding on while she can
Now touching you is such a strange thing She's so out of hand
I'm dreading all the baggage and what it brings
She's so out of hand
But still I'd do it all again
