

How I See It

Carina Round

You know it seems to me
You fail to see beauty through invisible tears
I know what you mean but
Its not what I'm getting at when
I say
'The bits of broken glass
In the evening sun reflection
Look like stars in the night sky
Of the central reservation'You just say
'That's not how I see it'Moving through the rain
I hear you here
Say life is a valley of tears
And your heart is a drain
But how can that be the truth when
The storm that came was invited by you?I say'The rain is just the moon
She's sending soul in your direction
I hope she softens you soon
With her subliminal affection'You just say
'That's not how I see it'There's something missing when you look at me
If all you see is what your eyes see
Hold on I'm coming in
