

# Fever

## Carly Rae Jepsen

Don't tell me this is how it ends  
I burn with fever that I caught from you  
My breath was lost when you said "friends"  
Well that could work but I'm still hot for you So I stole your bike  
And I rode all night  
But I'm so damn scared  
You don't even care You wanna break my heart, alright  
I caught your fever, I'll be feeling it forever  
You want a brand new start, alright  
I caught your fever, I'll be feeling it forever I've still been sleeping at my friend's  
Chopped off your helmet and lock for me  
I wrote some things I didn't send  
Three words to say that meant a lot to me So I rode your bike  
To your house last night  
And I'm so damn scared  
Cause your car's not there You wanna break my heart, alright  
I caught your fever, I'll be feeling it forever  
You want a brand new start, alright  
I caught your fever, I'll be feeling it forever And my lights stay up, but your city sleeps  
It's a different world when you're not here with me  
Go on and break my heart tonight  
I caught your fever, I'll be feeling it forever Don't break my heart tonight  
Don't break my heart tonight  
Don't break my heart tonight  
Don't break my heart tonight You wanna break my heart, alright  
I caught your fever, I'll be feeling it forever  
You want a brand new start, alright  
I caught your fever, I'll be feeling it forever And my lights stay up, but your city sleeps  
It's a different world when you're not here with me  
Go on and break my heart tonight  
I caught your fever, I'll be feeling it forever
