Rise

American Hi-fi

I don't know what I can take Can you feel the pressure break? I've been getting by on nothing How long? So long Feeling like I lost my vision Transmission full of dead ambition Kinda sorta, gotta get it together I can't wait forever Rise out of the atmosphere I gotta disappear I gotta get out of here You got the best of me Rise up and outta here Into the stratosphere I gotta get out of here You got the best of me I could never be that clever Even though it's now or never Counting down the seconds till it blows

4, 3, 2, 1

Disappear without a trace Could I be in outer space Staring at the sun till I get How high? So high Rise out of the atmosphere I gotta disappear I gotta get out of here You got the best of me Rise up and outta here Into the stratosphere I gotta get out of here You got the best of me Did I break down? Can we slow down? I wanna get out I don't wanna be so bored Rise out of the atmosphere I gotta disappear I gotta get out of here

You got the best of me Rise up and outta here Into the stratosphere I gotta get out of here You got the best of me You got the best of me You got the best of me You got the best of me
