Lie Detector Test

Bis

What if the world splits into two?
Would you lie in the fracture or look for the glue?
What if the bomb drops out of the sky?
Would you watch the explosion or just run and hide?I know it seems easier than it really isWhat if the liar once told the truth?
Would it destroy your conceptions by the skin of your tooth?
What if your friends turned out to be fakes?
Would you say that you knew or admit your mistakes?What if your friends were lying to you?
Would you see through the reason or think it was true?
What if the liar once told the truth?
Would you hear the protesting or destroy the youth?
