Easy Plateau

Ryan Adams

Let's take a ride to the easy plateau Where the cold don't come an' the wind don't blow Moonlight flickers on the water below The orange grove blossoms in the orange groveBad nights lead to better days Doesn't matter but I think about it anywayI want a easy plateau Some place to rest my head I want an easy plateau Some place to rest my head For awhile, for awhile, for awhile For a little whileSleepyhead, come on let's take a ride To the easy plateau in the back of your mind Up through the alley, take the door under the stairs My head ain't feelin' nothin' but cats an' rockin' chairsBad nights lead to better days Never happens but I think about it anywayI want an easy plateau Some place to hang my head I want an easy plateau Some place to hang my head For awhile, for awhile, for awhile For a little whileHow do I hold on to you If I can't hold on to me? How do I hold on to you? I want an easy plateau Some place to rest my head for a little whileI want an easy plateau Some place to rest my head I want an easy plateau Some place to rest my head An easy plateau
