Blue

Gemini

Cause you're lost in front of me It's true, I'm losing you Cause you're lost in front of me It's true, I'm losing youAnd you know it's alright, When you're gonna bring down Take everything and live for the moment, It's only gonna bring you down tonightWhen your locked up in my view, It's true I love you When your locked up in my blue, It's true I love youAnd you know it's alright, When you're gonna bring down, Take everything and live for the moment It's only gonna bring you down Bring you down Bring you downWhen I'm lost I'll come to you, So blue, I'm feeling you, When I'm lost I'll come to you, I'm blue, I feel youAnd you know it's alright, When you're gonna bring down, Take everything and live for the moment It's only gonna bring you down Bring you down Bring you downAnd you know it's alright, When you're gonna bring down Take everything and live for the moment, It's only gonna bring you down tonight
