

Runaway (feat. Nadia Ali)

[lio](#)

Can we go away and never turn around again?
On an escapade and always keep the vision Can we open out and spread ourselves around the sand?
Captivate the sun, keep the light till the world ends Runaway, runaway
Runaway, runaway Take away the wall and break away my defense
Candle by our side and never let the rain begin Runaway, runaway
Runaway, runaway We're a part of a plan and it's already written
There is no other way, it's inside our every sense Earth is our island
(Earth is our island)
Earth is our island
(Earth is our island) Runaway, runaway
Runaway, runaway Karma, am I yours is that your intuition
If that is your word, I'm the definition Earth is our island
(Earth is our island)
Earth is our island
(Earth is our island) Runaway, runaway
Runaway, runaway In our destinies, this is what was missing
Echo in my mind, even through my distance Runaway, runaway
Runaway, runaway Runaway, runaway
Runaway, runaway Runaway, runaway
Runaway, runaway We're a part of a plan and it's already written
Candle by our side and never let the rain begin
