

Get Ready for It

Take That

Get ready for it
Get ready for it You said whatever you put out there
Whatever you put out there is gonna come back
You said whenever you are ready
Whenever you are ready just let it all out
And I know cos the enemy inside me
'Cause the enemy inside me is holding me back
But we know there's something in the silence
There's something in the silence Get ready for it
Get ready for it
You said there's only one place left to find
Together we can save the world tonight
Get ready for it You said every life is a lesson
Are you a fool or a Kingsman?
'Cause only you know
Hold on cos the volume is rising
Yeah the volume is rising so you better hold on The night is young
Until it's over
Until it's over
The night is young
The night is ours
Until tomorrow
Until tomorrow Get ready for it
Yeah get ready for it
You said there's only one place left to find
Together we can save the world tonight
Get ready for it
Get ready for it
Get ready for it
Get ready for it The night is young
Until it's over
Until it's over
The night is young
The night is ours
Until tomorrow
Until tomorrow Get ready for it I'll hold your hand
With good intentions
With good intentions
I'll hold your hand

The night is ours
Until tomorrow
Until tomorrow
You said there's only one place left to find
Together we can save the world tonight
Get ready for it
Get ready for it
Get ready for it
Get ready for it
Get ready for it
