Free Us All

Marco Benevento

what if you find another
what if you see a stranger
how would you know the danger
why would i feel the same
how would i know the reason
what would i find in your love
what would i find without it
why would i know about it
how would i find the sacred
how would you see and deal with it
how would i know the sages
what would i care inside you
why don't you free us all
