

Feels Good

Volumes

It feels good
I'm waking up this time
Like I've never been tired
Of making up my mind
It feels good

I lit my last one
Then fell asleep in slime
Work at my habits
But the feel is so sublime
Another drag in and
My mind goes on a climb
That's where you'll catch me
Kuz it happens all the time

Always on the move
Always live & proof
I'm just tryin' to prove
What you disapproved
All this residue
Don't know what to do with
Facing down the truth
Tell me where were u

These are the hands that build me up
Where were you
I'm waking up this time
Like I've never been tired
Of making up my mind
It feels good

I lit my last one
Then fell asleep in slime
Work at my habits
But the feel is so sublime
Ready to deploy
Ready to exploit
Can't express my joy
My life I didn't destroy
I will not recoil

Dope inside the foil
Problems I can't avoid
I can not employ

How's it look now
Staring with your eyes to the fire
I won't look down
Staring with my eyes to the light
Feels good

I lit my last one
Then fell asleep in slime
Work at my habits
But the feel is so sublime
Another drag in and
My mind goes on a climb
That's where you'll catch me
Kuz it happens all the time
