

Dull Tool

Fiona Apple

Come on out, come on out
Where'd you go, where'd you go
I don't mean to play here Figure out, figure out
What you know, what you know
Figure out how to say it clear Cause you're more likely to get cut with a dull tool
Than a sharp one
You, you stuck around
You stuck around
You stuck around
Until you got me
And then, then you dropped me You, you don't kiss when you kiss
You don't fuck when you fuck
You don't say what you mean
You don't talk loud enough No pulse in your impulse, celebrations impossible You forgot the difference between
equanimity and passivity
You forgot you have to try, you have to try, you have to try
You forgot that glorious feeling that you get when you get the truth
So tell that girl you don't love her
And if you do, tell her two times Cause you're more likely to get cut with a dull tool
Than a sharp one You, you don't kiss when you kiss
You don't fuck when you fuck
You don't say what you mean
You don't talk loud enough No pulse in your impulse, celebrations impossible And you don't kiss when you kiss
You don't fuck when you fuck
You don't say what you mean
You don't talk loud enough No pulse in your impulse, celebrations impossible You don't kiss when you kiss
You don't fuck when you fuck
You don't say what you mean
You don't talk loud enough No pulse in your impulse, celebrations impossible When you don't kiss when you kiss
You don't fuck when you fuck
You don't say what you mean
You don't talk loud enough No pulse in your impulse, celebrations impossible
Celebrations impossible
Celebrations impossible
Celebrations impossible
