Cold Blue In the Night

Sham 69

They tried to tell me who I am
Well I've listened to you all
But you don't understand
The cold blue in the night
Is gonna make me feel alright
Don't tell me that I'm wrong
Taste the feeling then move onEyes all around but there out of sight
Late night express get ready for the crash
The mornings injured wounds
The soldiers last retreat
Don't tell me that I'm wrong
Taste the feeling then move onSomeones got to help me
Sympathy defeats me
I can't help myself
Someones got to help me
The tigers still inside me
I can't help myselfEternal smell of lonely darkness
The captured fox on a village hunt
The lions jagged tongue
Coming out and then undone
Don't tell me that I'm wrong
Taste the feeling then move on
