

# Fix Another

## Surrogate

Well, beyond the realm of normal life  
Where living isn't making friends  
I met a man who told me to wait for, wait for it Say what you will about hand to mouth  
And paying rent in different ways  
It seems to me that some people are made for, made for it Wait on every thing you said  
Wait on every thing you said  
Wait on every thing you said  
Wait on every thing you said  
Wait on every thing you said I can have a shot at normal life  
Meeting people is the hardest part  
It might be in the cards if I could play them, play them right The top of the world can be so cold  
Looking down on everyone  
You're the only picture that looks good from way up here I will wait on, I will wait on Wait on every thing you  
said  
Wait on every thing you said  
Wait on every thing you said  
Wait on every thing you said  
Wait on every thing you said Fix another drink  
Every day is Sunday since new year got away  
Fix another drink  
Every day is Sunday  
Oh, I will fix another drink  
Every day is Sunday since new years got away
