

I Still Think About You

Danger Danger

Lyin' all alone in bed
Crazy thoughts
Runnin' thru my head
Thinkin' about you Tryin' hard to let it go
My head says yes
But my heart says no
I wish I never had to choose I've been walkin' down
The same old road
Tryin' hard to forget ya
But I just can't let you go I still think about you
Do ya think about me?
I still think about you
No matter where you go
Just as sure as a cold wind blows
I still think about you
Do ya think about me? Baby I remember when
You and me were best of friends
We crossed out hearts
And swore it was forever But I guess that lovin' me
Was just a temporary thing
And I wish to God
That we were still together I hope you found what you were looking for
It's been three years
A lot of tears
Ain't got nothin' but this song When you're all alone
When you need a friend
I guess it doesn't matter
'Cuz what we had
We'll never have again - no! Lyin' all alone in bed
Crazy thoughts
Runnin' thru my head
Thinkin' about you I still think about you
Do ya think about me?
I still think about you
No matter where you go
Just as sure as the cold wind blows
I still think about you
Do ya think about me?
