

Left Behind

SECRETS

[Verse 1]

I've been placed with the task, of burning what I have left
Of any hope that I had , avoiding hopelessness.

The harder I try, the further I fall
Into a hole that's too deep to climb up it's walls.

I can't break free! [Chorus]

I got a feeling the world just left me behind (left me behind).
Every attempt that I make isn't enough to get by.

And there's no catching up this time [Bridge]

Oh, it costs enough to make your dreams go broke,
Oh, this costs enough to make your dreams go broke. [Verse 2]

When will this end? When will I finally begin to push
Past all the problems I've been drowning in?

I'm sick and tired of all the liars.

They're telling me that life gets better,
If I'd just pull myself together. [Chorus]

I got a feeling the world just left me behind (left me behind).
Every attempt that I make isn't enough to get by.

Consistent let down, all the way down,
Insistence won't help, that's what I've found.

I got a feeling the world just left me behind,
And there's no catching up this time. [Hook]

Oh, this costs enough to make your dreams go broke (your dreams go broke),
Oh, this costs enough to make your dreams go broke.

They're selling failures to me, purchase pending,
I can't afford them, but I can't stop spending.

Oh, oh, oh, this costs enough to make your dreams go broke! [Bridge]
This life's got me down, I struggle just to find the solid ground.

My thoughts are deceiving, I can't shake this feeling.

I need a new beginning! I got a feeling the world just left me behind (left me behind).
Every attempt that I make isn't enough to get by.

And there's no catching up this time. [Chorus]

I got a feeling the world just left me behind (left me behind).

Every attempt that I make isn't enough to get by (not enough, not enough to get by).

Consistent let down, all the way down (way down),

Insistence won't help, that's what I've found (what I've found)

I got a feeling the world just left me behind,

And there's no catching up this time. [Outro]

When will this end? When will I finally begin to push

Past all the problems I've been drowning in?
