

Steven

Denison Witmer

This was the first year
Of our years together
Your mother got sick
And your sister got marriedAnd this was the first year
Of our songs together
Simple cords are lovely
Simple words are heartfeltIts the best friends that need you
In my case believe you
Its the best friends lives kiss you
In my case miss youAnd you were there on Queen Street
When I was feeling down
And every word I said
Felt like it meant nothingThe only one I have
That understands my blues
Is making big predictions
Of life on the west coast soonIts the best friends that make you
Sometimes they break you
Its the best friends that move you
In my case see through youIts the best friends that need you
Sometimes the leave you
Its the best friends lives kiss you
In my case I'll miss youIts the best friends that make you
Sometimes they break you
Its the best friends that move you
In my case see through youIts the best friends that need you
In my case believe you
Its the best friends lives kiss you
In my case I'll miss you
