Full Circle

Contaminated Intelligence

[Verse 1]Seems like only yesterday that we were sleeping on the floor
Not a penny to our name nothing to eat
I was way too young to drive but still you handed me the keys
Had your trust I know you never doubted me
[Bridge]Now I?m cursing the days that came we're tearing us apart
Shoulda looked in the mirror woulda known it right from the start
And I was mistaken to be takin' this shit so far
It feels like this pain has just been taking over my memory
[Hook]When you think you got it all
(got it all, got it all)
won't know a thing until it's gone
(don't know a thing until its gone)
When you think you got it all
(you got it all, got it all)
won't know a thing until it's gone
(don't know a thing until its gone)
Be careful what you do, one day this shit is coming back for you
(its coming back, you feel it coming back) X2
[Belly]Everybody heard that you messin? with karma hah
Throwing the blame around
What's with all the drama I guess she came around
So you better say a prayer when you lay it down
What's ironic bout this game you can?t play around
I'm in the dark creepin' deeper than the shark eaten
You break my heart I fucking stab you with the sharp pieces
Now its on quiet storm
Bitch we mobb deepin? Hah!
We starved while we watched you all eating
That?s your heart beatin
Stampede
Chest all tight can?t breath
I seen a man bleed over damn greed
You know they got to try to kill what they can?t be

Mean m**f**ka flow with a lit match
Feel like I was in my grave I ain?t hopin? at ya hah
F**k it though I ain?t looking back
Cause now the formula is back, let me cook a batch
[Hook]When you think you got it all

(got it all, got it all)
won't know a thing until it's gone
(don't know a thing until its gone)
When you think you got it all
(you got it all, got it all)
won't know a thing until it's gone
(don't know a thing until its gone)
Be careful what you do, one day this shit is coming back for you
(its coming back, you feel it coming back) X2
[Verse 2]We was youngins in the streets and they?ll be talking about our flow
What we had is something they had never seen
We was walking toking blunts right through the sweat and blood and tears
Dreaming all about the things we wanna be
[Bridge]Now I?m cursing the days that came we're tearing us apart
Shoulda looked in the mirror woulda known it right from the start
And I was mistaken to be takin' this shit so far
It feels like this pain has just been taking over my memory
[Hook]When you think you got it all
(got it all, got it all)
won't know a thing until it's gone
(don't know a thing until its gone)
When you think you got it all
(you got it all, got it all)
won't know a thing until it's gone
(don't know a thing until its gone)
Be careful what you do, one day this shit is coming back for you
(its coming back, you feel it coming back)
