

# Loyalty (feat. Lil Wayne & Tyga)

## Birdman

You know while your mother is cooking the macaroni today  
I figured I'd sit down and talk to you since you're old enough  
You know it's time that you really realize what this family is all about  
'Cause about this time is when you're gonna be able to join in  
And earn some real money and real cash But before you do that, I wanna teach you a little bit about loyalty  
The main name of this game is respect and loyalty  
Family is a big thing  
When we do this kind of business, everything is with respect And when a family member gets outta line  
And another family don't like it  
One thing leads to another and the next thing you know, you're gone  
And then you're just a memory of me, my heart's broke then But you gotta remember, there's always family and  
loyalty  
Loyalty is the main thing Obviously you know I don't make my money  
I don't make all my cash from goin' to work everyday  
All these construction jobs we do and sanitation and private stuff  
Is all from earned money through the family And since you're of age now I think it's time I taught you  
What coming into the family and respect is all about  
So the first thing you gotta learn is the name respect  
That means you don't cross nobody, you don't go over the line Once you go over that line, there's no coming  
back  
Whether you're a member of the family or not  
That's when people get whacked  
And we don't want nobody whacked in our family So I gotta teach you the proper way of respect  
When you're earning money, everybody earns  
Everybody eats bread, it's all about cash money  
That's what it's all about, making the money So the first thing of business is this  
You remember your name, you don't forget your roots  
You never ever disrespect anyone that's above you  
Especially your Capo, especially the big time guys Those are the guys you listen to  
You never ever disrespect anyone, unless you're told to  
Unless you get the okay  
And if there is no sit down, there's nothin'
