

# Faith Healer

## Shonen Knife

Shoving me so I will hear  
While I am so weak I kneel  
Begging she'll remind me  
But she says few words not free  
So I leave the drafty tent  
This will be a ten well spent  
Rub my hands with effort to read  
Between the lines...like you do  
Dealing with the faith healer  
And trusting in the palm reader  
Now is the time we must get on  
When the healer's not around  
Let me talk love to you know  
As if I could show you how  
You are wonderful but nothing new  
The faith healer can do this too  
She arrives with warrant to close you down  
She's been around, sees through you  
With a warrant to close you down, she's been around
