Restore Me

[Fistful of Mercy](#)

You dream a lot about yourself
And you dream harsh winds upon your friends
But you wanna kill the beast that lives up in your head
And you wanna kill the beast that lives to see you dead
You dream a lot about the past
And you dream that's it's never gonna last
So you wanna give your love to your sister and your friends
And you wanna give your love to the one who's facing the end
You want it all but you got to give
You want it all but you've got to forgive
Restore me, restore me now
And make me sane
Restore me, restore me now
I got to give up your ghost
Restore me, restore me now
And make me sane
Restore me, restore me now
I got to give up your ghost
You make me lonely
You make me lonely
You make me lonely
You make me lonely
You want it all but you got to give
You want it all but you've got to forgive
You dream a lot about the past
And you dream that it's never going to last
