

# Choose Your Death

## Ncrodeath

Enclosed into my cage to satisfy emotions  
Many times had passed a process to erosion  
Descending to the cellar my bride "death" tolls the hour  
Face your brutal fellow, it's time for no tomorrow[Chorus]  
Future! - Summons image of life  
For the past! - I spread the wings of dying  
... and choose your death Torment of the lash, looses the ties of blood  
Sweetest dream realized, my deals front your God  
Repulsions of conception, psychoactive evolution  
I gain your last dishonour, burst the sound of sorrow[Chorus]  
Chosen victims, call suicide  
My dimensions, commence to arise  
Killing by shears, fills my body  
Trim your out limbs, nailed down your feelings to mine Once I had to return  
Echoes of deception  
Worms creep slowly along corpses left  
Cold spread my evolution  
Let my existence fries  
Blood is mixing tears  
Still the silence reduce my breath  
The rage rebounds in fear Choose your death! [X 3]
