

Antisocial

Front Line Assembly

Get up, do what you want
Before, before it's too late
Don't, don't worry yourself
What others try and think Kick down the door
To hell for more
Severe injections
A lethal dose Kick down the door
To hell with poverty
Clench your fist
And shout at them all It's just one lost cause
Clenched, clenched fists shout
We're souls, souls in ignorance
Break, break all the windows Shout deliverance
Break all the rules
Innocent victim Do what you want
Clench your fists
Clench your fists
Clench your fists
