Press Rewind

Engineers

If you could press rewind and do it all again
Would you change your mind, would you change a thing?
Would you make it easy, would you make it hard?
Would you play the game under another name
Or ask the dealer for one more card?
Bang your drum, sing your song
Don't give up, keep the faith, it won't be long
You've been high, you've been high and you've been low
Press rewind and let it go, let it go
Have you had your say, seen all you wanted to see?
Or did your dream give way to reality?
Don't think it's all too late for you to even try
Before you clip your wings, see what this life brings
You've waited too long, it's time to fly
Bang your drum, sing your song
Don't give up, keep the faith, it won't be long
You've been high, you've been high and you've been low
Press rewind and let it go

Do you believe in fate and what is meant to be?
Could you imagine life without a guarantee?
Would you appreciate that time was on your side?
A flash of second sight, a chance to do it right
Is something money just can't buy?
Bang your drum, sing your song
Don't give up, keep the faith, it won't be long
You've been high, you've been high and you've been low
Press rewind and let it go
Bang your drum, sing your song
Don't give up, keep the faith, it won't be long
You've been high, you've been high and you've been low
Press rewind and let it go
Bang your drum, sing your song
Don't give up, keep the faith, it won't be long
You've been high, you've been high and you've been low
Press rewind and let it go
