

On Standby

WeltZwei vs. Schaeben

Would you stay on standby?
Because I need another alibi
In the wrong place at the wrong time Could you talk a fine line?
I need to know that I'll be fine
Bulletproof It's like I've never been born
We conceive in the alleyways
It's like I've never been born We believe in other ways
That you do and you did
And there's proof
That we did wrong tonight Could you sense a tragedy?
Because I saw it on the BBC
There's a panel on that channel Could you walk a narrow line?
I need to know I'll serve my time
With some use It's like I've never been born
We conceive in the alleyways
It's like I've never been born We believe in other ways
That you do and you did
And there's proof
That we did wrong tonight And tonight
You can cry if you want to
But it won't help you You can cry if you want to
But it won't help you
To get you through this crime
It will plague you standby It's like I've never been born
We conceive in the alleyways
It's like I've never been born We believe in other ways
That you do and you did
And there's proof
That we did wrong tonight We did wrong, we did wrong
