Bright Lights Keep Shining

Comeback Kid

From the start of the day
To the end of the race
We thought we had this all figured out
Without a moment to wasteBut we choke, we choke on our words
We waste all of our days
Throw off another year
Living our lives is our greatest fearFrom being useless to being used
We lie awake wondering
Why another year is wasted
Another chance to live passed by usThis on the tip of our tongues
The silence of our lives
But this flame keeps burning
We'll never lay down and dieThis isn't hopeless, this isn't hopeless
We'll keep on fighting until the bitter end
This isn't hopeless, this isn't hopeless
We'll carry onForget about the boundaries
We'll leave that past behind
With every step we take
We'll finally redefine, we'll carry onWe are the bright lights
Let's not stop shining
This life will always be worth livingFrom the start of the day
To the end of the race
We thought we had this all figured out
Without a moment to wasteWe'll have our way
We'll have our way
We'll have our way
We'll have our way
