Send Me a Smile

Spiritual Beggars

Nominate myself for what I want to achive
Form my surroundings in relation to the seed
Smiles swims in a muddy breath
thirsting pulsating blood
What else can I do, than to feed me with a bigger thirstBut I wonder why tears run dry
Mind control
well I think I've lost mine
Let's climb the holy mountain
and eat the starsUnder the wisdom tree
we'll drink the weeping grass
I need my fire drug
to feel the flood
I'm selfdestructive baby
But a friendly oneYou better leave me here alone
I need this night to heal my world
Send me a smile and I'll get bye
