

# It's Hot

## Alain Delon

It's hot enough within this bed  
To melt our differences  
Whoa, a leap of faith  
This fiery love dissolves the edge  
Creates a bridge  
A leap of faith  
It's hot inside the chrysalis  
As cells create a dreamy bliss  
A leap of faith and out of this  
A floating kiss, life loves to exist  
Hangover after the party  
Whoa, a leap of faith  
Hangover after the party  
Whoa, a leap of faith  
It's hot inside the chrysalis  
As cells create a dreamy bliss  
A leap of faith and out of this  
A floating kiss, life loves to exist  
It's hot inside the chrysalis  
As cells create a dreamy bliss  
A leap of faith and out of this  
A floating kiss, life loves to exist  
It's hot inside the chrysalis  
As cells create a dreamy bliss  
A leap of faith and out of this  
A floating kiss, life loves to exist
