

# There's a Break In the Road

Betty Harris

Everybody find they own thing and I guess you think you found yours  
Your new thing's supposed to burn so hot, nothing like it ever before  
Like the last year's model you put me down, handled me like a used car  
And when you misuse the one that's been so good to you I don't believe you  
Get far Cause there's a break in the road, there's a break in every road  
I got mine, you'll get yours, there's a break in every road  
You just dog me around, treat me like dirt, you don't care how much I hurt  
But there's a break in the road, there's a break in every road You were the only man who could turn me on and  
make a bad girl out of me  
Made me do things I never dreamed of now you want to set me free  
Out in the cold I'm left alone while you galavant with your new girl  
Down worry lane you tell them all like you ain't got a care in the world But there's a break in the road, there's a  
break in every road  
I got mine, you'll get yours, there's a break in every road  
Riding high with your bad self but it's the woman that carry the load  
I'm gonna tell ya, there's break in every road There's a few things you don't understand about life and the things  
you do  
Same game you ran on me, somebody's gonna run it on you  
And there are newcomers gonna pull that heart, gonna wash away all of my  
Tears  
Well you need a new pair of windshield wipers 'cause you're not seeing  
Things too clear But there's a break in the road, there's a break in every road  
I got mine, you get yours, there's a break in every road
