

# I Believe It

Clint Crisher

Everything is for this  
Everything is falling into place  
What I've done, I've won  
There is a reason for this effort  
I'm not like you  
This will change my life... forever  
I don't do these words  
Though you might think so I read them from a vision  
I can see my footprints ahead of me  
The leader makes it so  
I can't stand  
I can't stand imperfection  
Imperfection, imperfection Like a star shoot across the sky  
You'll go far, just start to fly  
All you ideas and ways of motion  
Not multi-million dollars by the ocean I believe it  
I believe it... believe it, believe it. I believe it  
I can see it  
If you believe it  
The sun, the moon and the stars, will be yours  
The reason for life's bizarre will be yours  
If you can see it, live it...  
The sun and the moon and the start will be yours  
If you can see it, live it  
I believe it, I believe Days are getting colder  
What a crazy place here in space  
Like a cavalier with no fear  
You will find you could lose your mind  
I'm not like you  
This will change my life forever  
I don't own these words  
Though you might think so I read them from a vision  
I can see my footprints ahead of me  
The leader makes it so  
I can't stand  
I can't stand imperfection  
Imperfection, imperfection  
I can't stand imperfection Like a star shoot across the sky  
You'll go far, just start to fly

All your ideas and ways of motion  
Not multi-million dollar by the ocean I believe it  
I believe it, believe it. I believe it  
I can see it  
If you believe it  
The sun, the moon and the stars  
Will you yours  
If you can see it, live it...  
The sun and the moon and the stars will be yours  
If you can see it, live it  
I believe it, I believe  
I believe it  
I believe it  
I believe it
