

# Embryo

## Pink Floyd

All is love, is all I am  
A ball is all I am  
I'm so new compared to you  
And I am very small  
Warm glow, moon bloom  
Always need a little more room  
Waiting here seems like years  
Never seen the light of day

All around I hear strange sounds  
Come gurgling in my ear  
Red the light and dark the night  
I feel my dawn is near  
Warm glow, moon bloom  
Always need a little more room  
Whisper low, here I go  
I will see the sunshine show
