

# Be with You

## Kerry Louise Taylor

Free All of The Pain and make me learn to love again  
Released of of the love inside  
Welcome your charms into my Life  
    Tonight we Taking it high  
Cos i came real far i felt my Light  
    Shine overnight  
    Enter The Light  
    I felt you by my side  
    You led my way tonight  
    Released me made me love again  
Cos i love myself to the best i can you are part of my Plan  
    Released me took me to another land  
Where i can heal you understand together we can

    All alone not a sound  
Social network seems to silence  
    I know they feel it all around  
    Turn back or get in line cos  
    Cant get you out of my mind  
    I felt the weight on my shoulder  
So you took my hand tonight u took away the pain inside  
    You didnt want me now it seems that im free  
    Why Go Love when he dont love me  
        A wasted Time  
        I cleared my mind  
        Look away all the hurt  
        I pasted mine  
        Its my storyline

Took alway all the pain relieved me from them silly games to ease myself dont forget how i loved ya deep  
within you were my soul thats why i grin but now i flipped that page  
    Its for the rage for my stage  
    I exolain its my frame  
    You went away

    Be with you through my Darkest Night  
        No more sitting alone  
Be with you till we see the light yeah its how we feeling it  
  
    Be with you yeah wel take it far

Take it far tonight  
For my nite go lar  
Its how we do cos we got it right

Be with you tonight  
All the time ET  
Yeah they aint seen nothing yet
