

# Future Is in the Future

## Electric Six

If money talks then Im a mime  
If time is money then Im out of time  
And I was once with a million quid  
Have a seat Ill tell ya what I didCant sit down 'cause Im a dancer  
And you know that Im the answer  
Die slow, die fast now  
'Cause it's never gonna last nowWell karaoke all night long  
Well Macarena till the break of dawn  
Well drive around until the morning light  
All night, all night, all night, all nightBaby, you got to signal before you turn  
I think youre heading for the disco burn  
'Cause the future is in the future  
And the past is a big brick wallYou know I need to make you understand now  
Im a man not a disco ballCant sit down 'cause Im a dancer  
And you know that Im the answer  
Die slow, die fast now  
'Cause it's never gonna last nowWell karaoke all night long  
Well Macarena till the break of dawn  
Well drive around until the morning light  
All night, all night, all night, all nightWell karaoke all night long  
Well Macarena till the break of dawn  
Well drive around until the morning light  
All night, all night, all night, all nightAll night, all night, all night, all night  
All night, all night, all night, all night  
All night, all night, all night, all night  
All night, all night, all night, all night
