Lost And Found

Judas Priest

I always used to be afraid that I was gonna to lose my way
I never used to walk in line but straight
I never thought I'd see it through that I could keep on losing you
But suddenly I see the light of day
Leading me in out of the night
Staying across I'm still alive
I had to confess I never thought I
Would ever survive
I was lost and found I had run around
I was lost but now I'm found
Focused on my altered state I would just disorientate
Suffering alone amongst the crowd
Drifting on a sea of doubt and no one ever heard me shout
That I was lost and couldn't find a way
No one at hand having no plan
I stumbled through a barren land
And after so long going wrong
I found the road
I was lost and found I had hit the ground
I was lost but now I found
That I don't need no one to survive
You've got to believe alone you'll rise
And starting to run shedding the load
Now I can see I'm close to home
After so long of going wrong
I found the road
I was lost and found I had hit the ground
I was lost but now
I was lost and found I had hit the ground
I was lost but now
I was lost and found I had hit the ground
I was lost but now I'm found
