

Blind Date

Blind Date

So, you wanna go out with me
Watch me get on my knees and bleed?
I stole this scrapbook from you
Doesn't matter 'cause you stole it too
Sugarcoated kisses from my lips
Gives the excitement of a stolen bliss
To create, to love and fight
To create, to love and fight
To create, to love and fight
We won't sleep at all tonight
So, you wanna watch me scream
Dance with me and watch me bleed?
Steal the sound and love it too
Then baby, I'll howl for you
Confused and exhausted with a healthy fix
Let's drink some potion, get it over with
Shake it around, shake it around, shake it around
Move across town, bring their idols down
Shake it around, shake it around, shake it around
Move across town, kick their idols down
They're screaming 'bout the rock 'n' roll
I would say that it's getting old
Belongs to the museums
It's rotten soul been sold
Explosive and crude
Out of line and out of tune
Somehow knowing that
We'll get the message through
Hang on as the rebirth of cool takes place
You'll know the time, we'll set the pace
So, you wanna go out with me
Watch me get on my knees and bleed?
I stole this scrapbook from you
Doesn't matter 'cause you stole it too
Sugarcoated kisses from my lips
Gives the excitement of a stolen bliss
To create, to love and fight
We won't sleep at all tonight
Shake it around, shake it around, shake it around
Move across town, bring their idols down
Shake it around, shake it around, shake it around
Move across town, kill their idols
Shake it around, shake it around, shake it around
Move across town, brake their idols down
Shake it around, shake it around, shake it around
Move across town, kick their idols down
