

# Getting Bright At Night

## The Icarus Line

Stealing never felt so good  
Spoiled teens wish us well, as they should  
Feeling lower than low babe, every day  
Getting higher than high, starting to fade away I wont fall in love anymore, I wont fall  
Loose lips sink ships, so let's just be friends  
Stay up all the time now, never crash again  
Glass on the carpet cuts our faces Girl's green eyes destroy everyday  
(Now that feels great)  
I dont want to fall in love anymore  
But I cant stop falling in love  
And stimulation fits like a glove Got no soul? Girl, Ill die laughing  
Die alone, all by my accident  
While Im awake for days  
Surreal sways on the way No, hearts hurt [unverified], missed every morning  
Im getting tired of missing every morning  
But never give up on me babe Oh God, I been dancing in the darkness again  
And I dont love anyone  
Oh God, I been messing with the forces again  
And I dont know what Ive done
